Biology Vocabulary Matching 23

Write the word that best matches each definition or clue.

1. _____ An organism that eats producers.
2. _____ The ability to regrow a missing part of the body.
3. _____ Inhalation and exhalation of air.
4. _____ The transfer of pollen from male reproductive structures to female reproductive structures in plants.
5. _____ An organism that eats tertiary consumers.
6. _____ A selectively-permeable phospholipid bilayer forming the boundary of the cells.
7. _____ An organism that eats primary consumers.
8. _____ Type of succession that occurs in an area that was only partially destroyed by disturbances.
9. _____ A group of similar organisms that can breed and produce fertile offspring.
10. _____ Nutrients the body uses to build and maintain its cells and tissues.
11. _____ A fine dust that contains the sperm of seed-producing plants.
12. _____ A group of individuals that belong to the same species and live in the same area.
13. _____ Succession that occurs on surfaces where no soil exists.
14. _____ An allele that is masked when a dominant allele is present.
15. _____ The organ system that brings oxygen to body cells and removes waste gas.

secondary consumer	quarternary consumer	primary succession
pollination	plasma membrane	recessive allele
proteins	species	population
secondary succession	pollen	respiration
respiratory system	primary consumer	regeneration
