6th Grade CCSS Math Vocabulary Quiz 15

1. C   A plane figure with all points the same distance from a fixed point called a center.
A.common denominator B.capacity C.circle D.classify

2. B   To determine if one number is greater than, less than, or equal to another number.
A.circle B.compare C.arc D.capacity

3. A   Part of a circle between any two of its points.
A.arc B.add C.angle measure D.angle

4. D   The measure of the size of an angle.
A.acute angle B.circle C.area model D.angle measure

5. D   Refers to the amount of liquid a container can hold.
A.compare B.area C.circle D.capacity

6. A   A metric unit of length equal to 0.01 of a meter.
A.centimeter B.compare C.classify D.add

7. C   Any number being added.
A.area model B.acute angle C.addend D.common denominator

8. B   The measure in square units of the inside of a plane figure.
A.arc B.area C.capacity D.addend

9. D   To sort into categories or to arrange into groups by attributes.
A.common denominator B.area model C.area D.classify

10. C   Characteristics, properties, or features which allow items to be sorted and classified.
A.angle measure B.addend C.attributes D.array

11. B   Compares how much more or less one amount is than another.
A.common denominator B.additive comparison C.circle D.addend

12. A   A common multiple of the denominators for two or more fractions.
A.common denominator B.classify C.area D.compare

13. C   A model of multiplication that shows each place value product.
A.common denominator B.capacity C.area model D.arc

14. C   An angle with a measure less than 90 degrees.
A.compare B.addend C.acute angle D.area model

15. C   An arrangement of objects in equal rows.
A.attributes B.acute angle C.array D.compare

16. C   To combine or to put together two or more quantities
A.additive comparison B.compare C.add D.angle measure

17. D   A step-by-step method for computing
A.common denominator B.area model C.additive comparison D.algorithm

18. B   Two rays that share an endpoint.
A.algorithm B.angle C.addend D.additive comparison
