

6th Grade CCSS Math Vocabulary Quiz 22

1. ___ Two rays that share an endpoint.
A.angle measure B.algorithm C.arc D.angle
2. ___ A model of multiplication that shows each place value product.
A.circle B.additive comparison C.array D.area model
3. ___ A common multiple of the denominators for two or more fractions.
A.angle B.angle measure C.capacity D.common denominator
4. ___ Any number being added.
A.addend B.add C.algorithm D.centimeter
5. ___ The measure of the size of an angle.
A.attributes B.array C.centimeter D.angle measure
6. ___ To sort into categories or to arrange into groups by attributes.
A.angle measure B.acute angle C.classify D.angle
7. ___ A plane figure with all points the same distance from a fixed point called a center.
A.acute angle B.arc C.angle measure D.circle
8. ___ The measure in square units of the inside of a plane figure.
A.arc B.capacity C.angle measure D.area
9. ___ A step-by-step method for computing
A.algorithm B.common denominator C.acute angle D.angle measure
10. ___ Refers to the amount of liquid a container can hold.
A.classify B.add C.capacity D.area model
11. ___ An arrangement of objects in equal rows.
A.array B.angle C.additive comparison D.addend
12. ___ An angle with a measure less than 90 degrees.
A.algorithm B.area C.acute angle D.circle
13. ___ To combine or to put together two or more quantities
A.classify B.add C.area model D.additive comparison
14. ___ A metric unit of length equal to 0.01 of a meter.
A.circle B.add C.area model D.centimeter
15. ___ Compares how much more or less one amount is than another.
A.acute angle B.additive comparison C.algorithm D.circle
16. ___ To determine if one number is greater than, less than, or equal to another number.
A.area model B.area C.array D.compare
17. ___ Part of a circle between any two of its points.
A.arc B.classify C.array D.algorithm
18. ___ Characteristics, properties, or features which allow items to be sorted and classified.
A.centimeter B.capacity C.acute angle D.attributes
