

6th Grade CCSS Math Vocabulary Quiz 25

1. ___ A metric unit of mass equal to 1000 grams.
A.line B.kilogram C.inch D.improper fraction
2. ___ Denominators in two or more fractions that are the same.
A.line plot B.length C.like denominators D.kilometer
3. ___ One of the equal parts when a whole is divided into 100 equal parts.
A.hour B.hundredth C.kilometer D.inch
4. ___ A set of connected points continuing without end in both directions
A.line B.length C.kilometer D.line segment
5. ___ Operations that undo each other.
A.inverse operations B.kilogram C.kilometer D.length
6. ___ A diagram showing frequency of data on a number line
A.line plot B.improper fraction C.hundredth D.line of symmetry
7. ___ A customary unit of length. There of 12 of these in 1 foot.
A.kilogram B.inch C.mass D.intersecting lines
8. ___ A term for a fraction whose numerator is greater than or equal to its denominator.
A.mass B.improper fraction C.less than D.line segment
9. ___ Lines that cross at a point.
A.line plot B.intersecting lines C.lowest terms D.mass
10. ___ A comparison made when the first number is smaller than the second number.
A.mass B.line C.less than D.intersecting lines
11. ___ A line that divides a figure into two congruent halves that are mirror images of each other.
A.line of symmetry B.hundredth C.line D.hour
12. ___ A unit of time that equals 60 minutes.
A.like denominators B.line of symmetry C.line segment D.hour
13. ___ A part of a line with two endpoints.
A.line segment B.line of symmetry C.improper fraction D.inverse operations
14. ___ A metric unit of length equal to 1000 meters
A.intersecting lines B.kilometer C.hundredth D.liter
15. ___ The basic unit of capacity in the metric system.
A.intersecting lines B.liter C.line D.less than
16. ___ The amount of matter in an object.
A.lowest terms B.length C.line segment D.mass
17. ___ A fraction expressed in simplest form. The numerator and denominator have no factor in common except
A.less than B.length C.lowest terms D.hundredth
18. ___ How long something is. The distance from one point to another. Measured in units such as inches, feet, centimeters, etc.
A.line B.line of symmetry C.mass D.length
