

6th Grade CCSS Math Vocabulary Quiz 43

1. ___ A step-by-step method for computing
A.area model B.arc C.algorithm D.additive comparison
2. ___ Compares how much more or less one amount is than another.
A.arc B.additive comparison C.acute angle D.compare
3. ___ A plane figure with all points the same distance from a fixed point called a center.
A.area model B.algorithm C.area D.circle
4. ___ The measure in square units of the inside of a plane figure.
A.capacity B.additive comparison C.area D.common denominator
5. ___ A common multiple of the denominators for two or more fractions.
A.common denominator B.capacity C.array D.angle measure
6. ___ Characteristics, properties, or features which allow items to be sorted and classified.
A.attributes B.common denominator C.area D.area model
7. ___ To determine if one number is greater than, less than, or equal to another number.
A.circle B.array C.common denominator D.compare
8. ___ To combine or to put together two or more quantities
A.add B.circle C.capacity D.compare
9. ___ The measure of the size of an angle.
A.angle B.common denominator C.capacity D.angle measure
10. ___ Part of a circle between any two of its points.
A.additive comparison B.addend C.attributes D.arc
11. ___ An arrangement of objects in equal rows.
A.capacity B.area C.add D.array
12. ___ An angle with a measure less than 90 degrees.
A.common denominator B.centimeter C.angle measure D.acute angle
13. ___ A model of multiplication that shows each place value product.
A.compare B.area model C.arc D.capacity
14. ___ To sort into categories or to arrange into groups by attributes.
A.capacity B.addend C.arc D.classify
15. ___ Any number being added.
A.addend B.algorithm C.additive comparison D.array
16. ___ Refers to the amount of liquid a container can hold.
A.addend B.add C.capacity D.algorithm
17. ___ A metric unit of length equal to 0.01 of a meter.
A.add B.classify C.centimeter D.angle
18. ___ Two rays that share an endpoint.
A.circle B.angle C.common denominator D.arc
