

6th Grade CCSS Math Vocabulary Quiz 8

1. ___ Refers to the amount of liquid a container can hold.
A.circle B.array C.arc D.capacity
2. ___ To combine or to put together two or more quantities
A.attributes B.add C.angle measure D.compare
3. ___ An angle with a measure less than 90 degrees.
A.arc B.compare C.acute angle D.addend
4. ___ A model of multiplication that shows each place value product.
A.area model B.common denominator C.arc D.classify
5. ___ An arrangement of objects in equal rows.
A.arc B.acute angle C.capacity D.array
6. ___ A plane figure with all points the same distance from a fixed point called a center.
A.centimeter B.circle C.compare D.angle measure
7. ___ The measure of the size of an angle.
A.centimeter B.area model C.angle measure D.compare
8. ___ Characteristics, properties, or features which allow items to be sorted and classified.
A.angle measure B.attributes C.acute angle D.add
9. ___ The measure in square units of the inside of a plane figure.
A.classify B.area C.algorithm D.angle measure
10. ___ A step-by-step method for computing
A.compare B.add C.area D.algorithm
11. ___ A common multiple of the denominators for two or more fractions.
A.arc B.attributes C.common denominator D.array
12. ___ To determine if one number is greater than, less than, or equal to another number.
A.compare B.angle measure C.centimeter D.algorithm
13. ___ To sort into categories or to arrange into groups by attributes.
A.angle measure B.algorithm C.classify D.capacity
14. ___ Any number being added.
A.attributes B.addend C.algorithm D.angle measure
15. ___ Compares how much more or less one amount is than another.
A.capacity B.add C.attributes D.additive comparison
16. ___ Two rays that share an endpoint.
A.angle B.area model C.additive comparison D.common denominator
17. ___ A metric unit of length equal to 0.01 of a meter.
A.add B.centimeter C.area D.array
18. ___ Part of a circle between any two of its points.
A.arc B.add C.area model D.capacity
