

## 6th Grade CCSS Math Vocabulary Study Sheet 2

1. comparison bars      Used to represent larger and smaller amounts. Can be used to represent all four operations. Different lengths of bars are drawn to represent each number.
2. compose              To put together components or basic elements.
3. composite number    A number greater than zero that has more than two different factors.
4. congruent            Having exactly the same size and shape.
5. cup                    A customary unit of capacity equal to 8 fluid ounces.
6. customary system    A system of measurement used in the United States. The system includes units for measuring length, capacity, and weight.
7. data                   A collection of information gathered for a purpose. May be in the form of either words or numbers.
8. decimal              A number with one or more digits to the right of a decimal point.
9. decimal fraction      A fractional number with a denominator of 10 or a power of 10. Usually written with a decimal point.
10. decimal notation    A number containing a decimal point.
11. decimal point       A dot (.) used in decimal notation
12. decompose           To separate into components or basic elements.
13. degree               A unit for measuring angles based on dividing one complete circle into 360 equal parts.
14. denominator        The quantity below the line in a fraction. It tells how many equal parts are in the whole.
15. difference           The amount that remains after one quantity is subtracted from another.
16. digit                Any of the symbols 0, 1, 2, 3, 4, 5, 6, 7, 8, and 9
17. divide                To separate into equal groups and find the number in each group or the number of groups.
18. dividend            A number that is divided by another number.
