6th Grade CCSS Math Vocabulary Study Sheet 3

1. divisor — The number by which another number is divided.

2. endpoint — A point at either end of a line segment, or a point at one end of a ray.

3. equal — Having the same value.

4. equation — A mathematical sentence with an equals sign. The amount on one side of the equals sign has the same value as the amount on the other side.

5. equivalent fractions — Fractions that have the same value.

6. estimate — To find a number close to an exact amount.

7. expanded form — A way to write numbers that shows the place value of each digit.

8. expression — A mathematical phrase without an equal sign.

9. fact family — A group of related facts that use the same numbers. Also called related facts.

10. factors — The whole numbers that are multiplied to get a product.

11. factor pairs — A set of two whole numbers that when multiplied will result in a given product.

12. foot — A customary unit of length that equals 12 inches.

13. formula — A rule that is written as an equation.

14. fraction — A way to describe a part of a whole or a part of a group by using equal parts.

15. function table — A table that lists pairs of numbers that follow a rule.

16. gallon — A customary unit of capacity that equals 4 quarts.

17. gram — The standard unit of mass in the metric system.

18. greater than — Used to compare two numbers when the first number is larger than the second number.
