6th Grade CCSS Math Vocabulary Study Sheet 5

1. meter — A standard unit of length in the metric system.

2. metric system — A system of measurement based on tens. The basic unit of capacity is the liter. The basic unit of length is the meter. The basic unit of mass is the gram.

3. mile — A customary unit of length that equals 5,280 feet

4. milliliter — A metric unit of capacity. 1,000 of these = 1 liter.

5. millimeter — A metric unit of length. 1,000 of these equal 1 meter.

6. minute — One sixtieth of an hour or 60 seconds.

7. mixed number — A number that has a whole number (not 0) and a fraction.

8. multiple — A product made by multiplying two whole numbers larger than 1.

9. multiply — The operation of repeated addition of the same number.

10. number line — A diagram that represents numbers as points on a line.

11. numerator — The number written above the line in a fraction. It tells how many equal parts are described in the fraction.

12. obtuse angle — An angle with a measure greater than 90° but less than 180°.

13. order of operations — A set of rules that tells the order in which to compute. PEMDAS.

14. ounce — A customary unit of weight equal to one sixteenth of a pound.

15. parallel lines — Lines that are always the same distance apart and don't intersect.

16. parentheses — Used in mathematics as grouping symbols for operations. When simplifying an expression, the operations within these are performed first.

17. pattern — A repeating or growing sequence or design. An ordered set of numbers or shapes arranged according to a rule.

18. perimeter — The distance around the outside of a figure.
