

7th Grade CCSS Math Vocabulary List 2

1. diameter	Equal to twice the radius of the circle.
2. direct variation	When values vary so that one increases or decreases a specific amount, the other value increases or decreases by a constant.
3. equation	Mathematical sentence that is created by placing an equal sign between two expressions.
4. exterior angle theorem	Measure of the exterior angle of a triangle is equal to the sum of the measures of the two remote interior angles of the triangle.
5. exterior angles	Angles on the outside of a triangle.
6. greatest common factor	Largest factor that two or more numbers or terms have in common.
7. inscribed circle	Circle that fits exactly within the boundaries of another shape.
8. inverse operations	Operations that undo each other.
9. linear pair	Two adjacent angles that have noncommon sides that form a line.
10. mean	Average of data set.
11. mean absolute deviation	Average of the absolute values of the deviations of each data value from the mean.
12. median	Order numbers least to greatest then find the middle value or find average of two middle values.
13. mode	In a data set, this is the value(s) that occurs most often.
14. multiplicative inverse	Two numbers that when multiplied together equal 1.
15. non-repeating decimals	Decimal neither terminates nor repeats.
16. non-terminating decimal	Decimal that continues without end.
17. obtuse angle	Angle whose measure is greater than 90° but less than 180° .
18. outcome	Result of a single trial of an experiment.
