

# 7th Grade CCSS Math Vocabulary Quiz 1

- A Angles that have the same relative position in geometric figures.  
A.corresponding angles B.adjacent angles C.combine like terms D.constant of proportionality
- D Two or more angles that have equal measures.  
A.base of pyramid B.complementary angles C.constant of proportionality D.congruent angles
- B Refers to the outside of a circle.  
A.circle B.circumference of circle C.complementary angles D.algebraic expressions
- B A number or an algebraic expression that is a factor of two or more numbers or algebraic expressions.  
A.congruent angles B.common factor C.circle D.algebraic expressions
- B Ratio between two values is always the same or constant.  
A.common factor B.constant of proportionality C.adjacent angles D.bar notation
- D Used for repeating decimals. A bar is drawn of digits that repeat.  
A.common factor B.corresponding angles C.base of pyramid D.bar notation
- A Simplify expressions by adding or subtracting like terms.  
A.combine like terms B.commission C.algebraic expressions D.circumference of circle
- D Sum of their angle measures is equal to  $90^\circ$ .  
A.corresponding angles B.commission C.base of pyramid D.complementary angles
- C Collection of data from every member of a population.  
A.constant of proportionality B.coefficient C.census D.complementary angles
- B Mathematical phrase involving at least one variable and sometimes numbers and operation symbols.  
A.convert B.algebraic expressions C.common factor D.cross section
- B Two angles that share a common vertex and a common side.  
A.combine like terms B.adjacent angles C.constant of proportionality D.algebraic expressions
- B Collection of points on the same plane equidistant from the same point.  
A.commission B.circle C.base of pyramid D.adjacent angles
- C Single polygon face.  
A.cross section B.complementary angles C.base of pyramid D.common factor
- A Amount of money a salesperson earns after selling a product.  
A.commission B.acute angle C.complementary angles D.common factor
- A Change it to an equivalent measurement in different units.  
A.convert B.adjacent angles C.congruent angles D.complementary angles
- B Formed by the intersection of a plane and a solid when a plane passes through the solid.  
A.corresponding angles B.cross section C.circle D.common factor
- A An angle whose measure is greater than  $0^\circ$  but less than  $90^\circ$ .  
A.acute angle B.adjacent angles C.constant of proportionality D.complementary angles
- B Number that is multiplied by a variable in an algebraic equation.  
A.census B.coefficient C.circle D.combine like terms
