

7th Grade CCSS Math Vocabulary Quiz 10

1. ___ Mathematical sentence that is created by placing an equal sign between two expressions.
A.equation B.mean C.diameter D.exterior angles
2. ___ Order numbers least to greatest then find the middle value or find average of two middle values.
A.non-repeating decimals B.linear pair C.greatest common factor D.median
3. ___ Average of the absolute values of the deviations of each data value from the mean.
A.mean absolute deviation B.inverse operations C.non-terminating decimal D.equation
4. ___ Decimal that continues without end.
A.multiplicative inverse B.non-terminating decimal C.median D.mean absolute deviation
5. ___ Largest factor that two or more numbers or terms have in common.
A.diameter B.median C.greatest common factor D.outcome
6. ___ Operations that undo each other.
A.linear pair B.non-terminating decimal C.inverse operations D.mean
7. ___ Circle that fits exactly within the boundaries of another shape.
A.inscribed circle B.mean absolute deviation C.non-terminating decimal D.linear pair
8. ___ Measure of the exterior angle of a triangle is equal to the sum of the measures of the two remote interior angles of the triangle.
A.exterior angle theorem B.linear pair C.non-repeating decimals D.non-terminating decimal
9. ___ Two adjacent angles that have noncommon sides that form a line.
A.mean absolute deviation B.linear pair C.direct variation D.exterior angles
10. ___ Equal to twice the radius of the circle.
A.mean absolute deviation B.diameter C.outcome D.greatest common factor
11. ___ Two numbers that when multiplied together equal 1.
A.inscribed circle B.multiplicative inverse C.obtuse angle D.non-terminating decimal
12. ___ Decimal neither terminates nor repeats.
A.outcome B.diameter C.direct variation D.non-repeating decimals
13. ___ When values vary so that one increases or decreases a specific amount, the other value increases or decreases by a constant.
A.direct variation B.inscribed circle C.median D.diameter
14. ___ Angle whose measure is greater than 90° but less than 180° .
A.multiplicative inverse B.exterior angles C.mean absolute deviation D.obtuse angle
15. ___ Angles on the outside of a triangle.
A.exterior angles B.obtuse angle C.linear pair D.non-repeating decimals
16. ___ Result of a single trial of an experiment.
A.outcome B.exterior angles C.direct variation D.equation
17. ___ Average of data set.
A.inscribed circle B.mean C.non-terminating decimal D.exterior angle theorem
18. ___ In a data set, this is the value(s) that occurs most often.
A.outcome B.mode C.inscribed circle D.median
