

7th Grade CCSS Math Vocabulary Quiz 6

1. ___ Two numbers that when multiplied together equal 1.
A.inverse operations B.multiplicative inverse C.exterior angle theorem D.non-terminating decimal
2. ___ Measure of the exterior angle of a triangle is equal to the sum of the measures of the two remote interior angles of the triangle.
A.diameter B.mean C.linear pair D.exterior angle theorem
3. ___ Mathematical sentence that is created by placing an equal sign between two expressions.
A.mean absolute deviation B.equation C.non-terminating decimal D.inscribed circle
4. ___ When values vary so that one increases or decreases a specific amount, the other value increases or decreases by a constant.
A.direct variation B.equation C.obtuse angle D.median
5. ___ Two adjacent angles that have noncommon sides that form a line.
A.diameter B.median C.linear pair D.non-repeating decimals
6. ___ Angle whose measure is greater than 90° but less than 180° .
A.non-repeating decimals B.inverse operations C.obtuse angle D.exterior angles
7. ___ Largest factor that two or more numbers or terms have in common.
A.inverse operations B.greatest common factor C.non-terminating decimal D.linear pair
8. ___ Decimal that continues without end.
A.equation B.linear pair C.exterior angles D.non-terminating decimal
9. ___ Decimal neither terminates nor repeats.
A.inscribed circle B.outcome C.greatest common factor D.non-repeating decimals
10. ___ Equal to twice the radius of the circle.
A.non-repeating decimals B.diameter C.exterior angles D.greatest common factor
11. ___ Result of a single trial of an experiment.
A.outcome B.mean C.linear pair D.exterior angles
12. ___ Average of data set.
A.mean B.obtuse angle C.inscribed circle D.linear pair
13. ___ Average of the absolute values of the deviations of each data value from the mean.
A.mode B.greatest common factor C.equation D.mean absolute deviation
14. ___ Order numbers least to greatest then find the middle value or find average of two middle values.
A.non-terminating decimal B.inscribed circle C.median D.outcome
15. ___ Operations that undo each other.
A.equation B.inverse operations C.median D.exterior angles
16. ___ Angles on the outside of a triangle.
A.equation B.inverse operations C.exterior angles D.mean absolute deviation
17. ___ In a data set, this is the value(s) that occurs most often.
A.mean B.equation C.multiplicative inverse D.mode
18. ___ Circle that fits exactly within the boundaries of another shape.
A.multiplicative inverse B.inscribed circle C.diameter D.greatest common factor
