

5th Grade CCSS Math Vocabulary Quiz 12

1. D A pair of symbols used to set apart parts of a problem so that those parts are done first. ()
A.rule B.divisible C.product D.parentheses
2. B The ratio of a number to 100 (per one hundred). %
A.prime factorization B.percent C.ordered pairs D.consecutive
3. A A general statement written in numbers, symbols, or words that describes how to determine any term in a pattern or relationship.
A.rule B.product C.calculate D.parentheses
4. B Can be divided evenly without leaving a remainder.
A.calculate B.divisible C.equivalent D.rule
5. B A plane formed by the intersection of a horizontal number line called the x-axis and a vertical number line called the y-axis.
A.rule B.coordinate plane C.remainder D.parentheses
6. B A way of making sure your answer is reasonable by making an approximate calculation. Rounding is a commonly used strategy.
A.percent B.estimation C.numerical pattern D.prime factorization
7. B Having the same value or amount.
A.reduce B.equivalent C.numerical pattern D.rule
8. D A pair of symbols used to enclose sections of an expression. []
A.ordered pairs B.parentheses C.rule D.brackets
9. A Breaking down a composite number until all of the factors are prime.
A.prime factorization B.rule C.parentheses D.brackets
10. A A pattern containing numbers.
A.numerical pattern B.brackets C.consecutive D.estimation
11. D To follow each other in an unbroken sequence.
A.ordered pairs B.reduce C.prime factorization D.consecutive
12. D To rewrite a fraction in lowest terms.
A.rule B.percent C.divisible D.reduce
13. B The left-over amount when a number cannot be divided equally.
A.numerical pattern B.remainder C.reduce D.ordered pairs
14. C To find the answer by using arithmetic, adding, subtracting, multiplying or dividing. To figure out by reason or logic.
A.product B.brackets C.calculate D.prime factorization
15. C Pairs of numbers used to locate points on a coordinate grid. The first number in a pair tells how far to move horizontally, and the second number tells how far to move vertically.
A.divisible B.percent C.ordered pairs D.prime factorization
16. C The answer to a multiplication problem.
A.parentheses B.divisible C.product D.reduce
