## 5th Grade CCSS Math Vocabluary Quiz 12

1. _ A pair of symbols used to set apart parts of a problem so that those parts are done first. ()

- A.rule B.divisible C.product D.parentheses

2. _ The ratio of a number to 100 (per one hundred). \%
A.prime factorization B.percent C.ordered pairs D.consecutive
3. _ A general statement written in numbers, symbols, or words that describes how to determine any term in a pattern or relationship.
A.rule B.product C.calculate D.parentheses
4. _ Can be divided evenly without leaving a remainder.
A.calculate B.divisible C.equivalent D.rule
5. _ A plane formed by the intersection of a horizontal number line called the x-axis and a vertical number line called the $y$-axis.
A.rule B.coordinate plane C.remainder D.parentheses
6. _ A way of making sure your answer is reasonable by making an approximate calculation. Rounding is a commonly used strategy.
A.percent B.estimation C.numerical pattern D.prime factorization
7. _ Having the same value or amount.
A.reduce B.equivalent C.numerical pattern D.rule
8. _ A pair of symbols used to enclose sections of an expression. []

- A.ordered pairs B.parentheses C.rule D.brackets

9.     - Breaking down a composite number until all of the factors are prime.
A.prime factorization B.rule C.parentheses D.brackets
10. _ A pattern containing numbers.

- A.numerical pattern B.brackets C.consecutive D.estimation

11. _ To follow each other in an unbroken sequence.
A.ordered pairs B.reduce C.prime factorization D.consecutive
12. _ To rewrite a fraction in lowest terms.

- A.rule B.percent
C.divisible
D.reduce

13. _ The left-over amount when a number cannot be divided equally.
A.numerical pattern B.remainder C.reduce D.ordered pairs
14. _ To find the answer by using arithmetic, adding, subtracting, multiplying or dividing. To figure out by reason or logic.
A.product B.brackets C.calculate D.prime factorization
15. _ Pairs of numbers used to locate points on a coordinate grid. The first number in a pair tells how far to move horizontally, and the second number tells how far to move vertically.
A.divisible B.percent C.ordered pairs D.prime factorization
16. _ The answer to a multiplication problem.
A.parentheses B.divisible C.product D.reduce
