

5th Grade CCSS Math Vocabulary Quiz 25

- B Changing the order of the factors does not change the product.
A.symbol B.commutative property of multiplication C.prime number D.least common multiple
- A Anything that stands for or represents something else.
A.symbol B.vertex C.prime number D.function table
- B A whole number that has exactly two factors, 1 and itself.
A.squared B.prime number C.least common multiple D.variable
- A The product of any number and zero is zero.
A.zero property of multiplication B.whole C.volume D.distributive property
- B The smallest number that is a common multiple of a given set of numbers.
A.prime number B.least common multiple C.whole D.squared
- A When the exponent is 2.
A.squared B.commutative property of multiplication C.sequence D.zero property of multiplication
- B The point where two rays of an angle, two sides of a polygon, or 3 or more edges of a solid figure meet.
A.divisible B.vertex C.least common multiple D.associative property of multiplication
- B The order in which things happen. The following of one thing after another. The orderly series or succession.
A.least common multiple B.sequence C.squared D.volume
- B The amount of space that something occupies or the amount of space that something contains.
A.prime factorization B.volume C.zero property of multiplication D.prime number
- B Changing the grouping of three or more factors does not change the product.
A.least common multiple B.associative property of multiplication C.symbol D.variable
- C All of the parts of something.
A.vertex B.divisible C.whole D.symbol
- B A whole number that can divide evenly into another number without a remainder.
A.whole B.divisible C.distributive property D.function table
- A When one of the factors of a product is a sum, multiplying each addend before adding does not change the product.
A.distributive property B.associative property of multiplication C.divisible D.least common multiple
- D A table that lists pairs of numbers that follow a rule.
A.zero property of multiplication B.squared C.least common multiple D.function table
- D A letter or symbol used to represent a number.
A.divisible B.function table C.whole D.variable
- D Breaking down a composite number until all of the factors are prime.
A.sequence B.prime number C.commutative property of multiplication D.prime factorization
