5th Grade CCSS Math Vocabluary Quiz 31

1. ___ A pair of symbols used to enclose sections of an expression. { }
   A.point   B.square root   C.coefficient   D.braces

2. ___ A number written as a product of its factors.
   A.relationship   B.expression   C.factorization   D.point

3. ___ A number in front of a variable.
   A.expression   B.inequality   C.inverse operations   D.coefficient

4. ___ To find the value of a numerical or algebraic expression.
   A.exponent   B.solution   C.inequality   D.evaluate

5. ___ PEMDAS (Parentheses, Exponents, Multiplication/Division left to right, Addition/Subtraction left to right).
   A.order of operations   B.forms   C.inequality   D.factorization

6. ___ A mathematical phrase that contains operations, numbers, and/or variables, but doesn't have an equal sign.
   A.pair   B.expression   C.inequality   D.factorization

7. ___ A mathematical notation indicating the number of times a quantity is multiplied by itself.
   A.operation   B.relationship   C.exponent   D.pair

8. ___ Operations that undo each other.
   A.evaluate   B.inequality   C.inverse operations   D.coefficient

9. ___ A mathematical process applied to solve a problem.
   A.operation   B.braces   C.order of operations   D.forms

10. ___ A set of two things used together or regarded as a unit.
    A.pair   B.braces   C.order of operations   D.inverse operations

11. ___ An exact location in space represented by a dot.
    A.inverse operations   B.operation   C.square root   D.point

12. ___ The ways that two things are similar, different, or otherwise connected. An association between two or more variables.
    A.relationship   B.coefficient   C.expression   D.order of operations

13. ___ Three-dimensional objects that have height, length, and width such as spheres, cylinders, cones, cubes, rectangular prisms, and pyramids. Shapes, appearances, or arrangements.
    A.point   B.forms   C.square root   D.inverse operations

14. ___ A mathematical expression which shows that two quantities are not equal.
    A.inverse operations   B.point   C.forms   D.inequality

15. ___ The explanation or answer for a problem.
    A.operation   B.solution   C.pair   D.point

16. ___ A number that when multiplied by itself equals a given number.
    A.exponent   B.pair   C.order of operations   D.square root
