

## 5th Grade CCSS Math Vocabulary Quiz 4

1. D A mathematical process applied to solve a problem.  
A. quarter B. numerator C. greatest common factor D. operation
2. B The bottom number in a fraction.  
A. median B. denominator C. increment D. numerator
3. B A comparison of two or more numbers using division.  
A. median B. ratio C. half D. mean
4. C An increase or addition, especially one of a series on a fixed scale.  
A. denominator B. range C. increment D. ratio
5. A The top number in a fraction.  
A. numerator B. denominator C. ratio D. half
6. C The number that occurs most often in a set of data.  
A. range B. half C. mode D. interpret
7. D The largest number that is a common divisor of a given set of numbers.  
A. interpret B. equation C. simplify an expression D. greatest common factor
8. A A mathematical statement that includes an equal sign.  
A. equation B. increment C. part D. range
9. B The average of a set of numbers.  
A. median B. mean C. greatest common factor D. quarter
10. C The difference between the greatest and least numbers in a set of data.  
A. quarter B. interpret C. range D. simplify an expression
11. D One of two equal parts.  
A. greatest common factor B. median C. mean D. half
12. B To remove brackets, unnecessary numbers, and terms.  
A. median B. simplify an expression C. equation D. increment
13. B To explain or tell the meaning of something.  
A. quarter B. interpret C. range D. mean
14. A One of four equal parts.  
A. quarter B. half C. ratio D. greatest common factor
15. B The middle number in a set of numbers that are listed in order.  
A. interpret B. median C. greatest common factor D. simplify an expression
16. D A portion or piece of a whole.  
A. mean B. quarter C. increment D. part
