

3rd Grade CCSS Math Vocabulary Crossword Puzzle 2

1. Using the Across and Down clues, write the correct words in the numbered grid below.

ACROSS

2. Changing the order of the factors does not change the product.
3. Having exactly the same size and shape.
4. Changing the order of the addends does not change the sum.
5. Numbers that are easy to compute mentally and are close in value to the actual numbers. Useful for estimating.
7. Any of the digits 0, 1, 2, 3, 4, 5, 6, 7, 8, or 9. These symbols can represent any amount based on a place value system of grouping by tens.
8. A system of measurement used in the U.S. The system includes units for measuring length, capacity, and weight.
9. A graph that uses the height or length of rectangles to compare data.

column
congruent
data
base-ten numerals
customary system
bar graph

DOWN

1. The whole numbers that can be used to count a set of objects. (Example: 1, 2, 3, 4...)
3. A figure that begins and ends at the same point.
4. A vertical arrangement of numbers or information in an array or table.
5. To decide if one number is greater than, less than, or equal to another number.
6. A collection of information.

commutative property of multiplication
compatible numbers
commutative property of addition
compare
counting numbers
closed shape
