3rd Grade CCSS Math Vocabulary Quiz 6

1. __ A polygon with eight sides.
   A.minute   B.open shape   C.octagon   D.multiply

2. __ One sixtieth of an hour or 60 seconds.
   A.odd number   B.minute   C.number line   D.parallel lines

3. __ A product of a given whole number and any other whole number.
   A.number line   B.minute   C.multiple   D.order

4. __ Cannot be shown as two equal parts.
   A.multiple   B.odd number   C.multiply   D.open shape

5. __ Lines that are always the same distance apart.
   A.number line   B.odd number   C.parallel lines   D.multiply

6. __ If you multiply a number by 1, the product is the same as that number.
   A.order   B.multiplication identity property of 1   C.open shape   D.multiple

7. __ A set of rules that tells the order in which to compute. PEMDAS
   A.multiple   B.multiply   C.order   D.order of operations

8. __ A diagram that represents numbers as points on a line.
   A.number line   B.order of operations   C.multiplication identity property of 1   D.parallel lines

9. __ A sequence or arrangement of things.
   A.order   B.multiplication identity property of 1   C.minute   D.octagon

10. __ The operation of repeated addition of the same number.
    A.odd number   B.multiply   C.octagon   D.multiplication identity property of 1

11. __ The number written above the line in a fraction. It tells how many equal parts are described in the fraction.
    A.order of operations   B.open shape   C.numerator   D.octagon

12. __ A figure that does not begin and end at the same point.
    A.multiplication identity property of 1   B.open shape   C.parallel lines   D.order
