

## 3rd Grade CCSS Math Word Search 2

1. First, write the correct clue number to the left of each word in the Word Bank. Then, circle the words that have been hidden vertically, horizontally, and diagonally.

1. A collection of information.
2. Numbers that are easy to compute mentally and are close in value to the actual numbers. Useful for estimating.
3. A figure that begins and ends at the same point.
4. A system of measurement used in the U.S. The system includes units for measuring length, capacity, and weight.
5. Having exactly the same size and shape.
6. To decide if one number is greater than, less than, or equal to another number.
7. A vertical arrangement of numbers or information in an array or table.
8. Changing the order of the factors does not change the product.
9. The whole numbers that can be used to count a set of objects. (Example: 1, 2, 3, 4...)
10. A graph that uses the height or length of rectangles to compare data.
11. Changing the order of the addends does not change the sum.
12. Any of the digits 0, 1, 2, 3, 4, 5, 6, 7, 8, or 9. These symbols can represent any amount based on a place value system of grouping by tens.
