1. A point at which two or more sides of a geometric figure meet.
2. Having length and width. Having area, but not volume.
3. A duration of a segment of time.
4. Whole numbers are zero and the counting numbers $1,2,3,4,5,6$, and so on.
5. The product of any number and zero is zero.
6. A letter or symbol that represents a number.
7. A square with side lengths of 1 unit each. It has an area of 1 square unit.
8. A quadrilateral with one pair of parallel sides and one pair of sides that are not parallel.
9. The parts you get when you divide something into 3 equal parts.
10. A table that uses tally marks to record data.
11. A polygon with three sides and three angles.
12. A fraction that has 1 as its numerator.
two-dimensional
trapezoid
unit square
thirds
vertex
variable
triangle
zero property of multiplication
time interval
unit fraction
tally table
whole numbers
