

3rd Grade CCSS Math Word Search 22

1. First, write the correct clue number to the left of each word in the Word Bank. Then, circle the words that have been hidden vertically, horizontally, and diagonally.

1. A graph that uses the height or length of rectangles to compare data.
2. To decide if one number is greater than, less than, or equal to another number.
3. Numbers that are easy to compute mentally and are close in value to the actual numbers. Useful for estimating.
4. Changing the order of the addends does not change the sum.
5. A figure that begins and ends at the same point.
6. The whole numbers that can be used to count a set of objects. (Example: 1, 2, 3, 4...)
7. Any of the digits 0, 1, 2, 3, 4, 5, 6, 7, 8, or 9. These symbols can represent any amount based on a place value system of grouping by tens.
8. Having exactly the same size and shape.
9. A collection of information.
10. A vertical arrangement of numbers or information in an array or table.
11. Changing the order of the factors does not change the product.
12. A system of measurement used in the U.S. The system includes units for measuring length, capacity, and weight.
