

## 3rd Grade CCSS Math Vocabulary Study List 1

- |  |  |
|--|--|
| 1. add                                     | To combine two or more quantities.   |
| 2. addend                                  | Any number being added.  |
| 3. additive identity property of zero      | When you add zero to a number, the sum is that same number.                                    |
| 4. algorithm                               | A step-by-step method for computing.   |
| 5. analog clock                            | A clock that shows the time by the positions of the hour and minute hand.                      |
| 6. area                                    | The measure in square units of the inside of a plane figure.                                   |
| 7. area model                              | A model of multiplication that shows each place value product within a rectangle drawing.      |
| 8. arithmetic patterns                     | A sequence of numbers in which the difference between any two consecutive numbers is the same. |
| 9. array                                   | An arrangement of objects in equal rows.   |
| 10. associative property of addition       | Changing the grouping of three or more addends does not change the sum.                        |
| 11. associative property of multiplication | Changing the grouping of three or more factors does not change the product.                    |
| 12. attribute                              | A characteristic of an object such as color, shape, size, etc.                                 |
