

## 3rd Grade CCSS Math Vocabulary Study Sheet 2

- |   |  |
|---|--|
| 1. bar graph                              | A graph that uses the height or length of rectangles to compare data.  |
| 2. base-ten numerals                      | Any of the digits 0, 1, 2, 3, 4, 5, 6, 7, 8, or 9. These symbols can represent any amount based on a place value system of grouping by tens. |
| 3. closed shape                           | A figure that begins and ends at the same point.   |
| 4. column                                 | A vertical arrangement of numbers or information in an array or table.   |
| 5. commutative property of addition       | Changing the order of the addends does not change the sum.   |
| 6. commutative property of multiplication | Changing the order of the factors does not change the product.   |
| 7. compare                                | To decide if one number is greater than, less than, or equal to another number.  |
| 8. compatible numbers                     | Numbers that are easy to compute mentally and are close in value to the actual numbers. Useful for estimating.                               |
| 9. congruent                              | Having exactly the same size and shape.  |
| 10. counting numbers                      | The whole numbers that can be used to count a set of objects. (Example: 1, 2, 3, 4...)   |
| 11. customary system                      | A system of measurement used in the U.S. The system includes units for measuring length, capacity, and weight.                               |
| 12. data                                  | A collection of information.   |
