

4th Grade CCSS Math Vocabulary Quiz 17

- C A term used for a fraction whose numerator is greater than or equal to its denominator.
A.kilometer B.length C.improper fraction D.kilogram
- C A metric unit of length equal to 1,000 meters.
A.length B.improper fraction C.kilometer D.inch
- A Used to compare two numbers when the first number is smaller than the second number.
A.less than B.kilometer C.intersecting lines D.inverse operations
- A Lines that cross at a point.
A.intersecting lines B.length C.identity property of multiplication D.less than
- B A customary unit of length equal to $\frac{1}{12}$ of a foot.
A.inverse operations B.inch C.kilometer D.length
- B One of the equal parts when a whole is divided into 100 equal parts.
A.inverse operations B.hundredth C.identity property of multiplication D.intersecting lines
- D A metric unit of mass equal to 1,000 grams.
A.hundredth B.identity property of multiplication C.inverse operations D.kilogram
- A Operations that undo each other.
A.inverse operations B.kilogram C.hundredth D.kilometer
- D A unit of time equal to 60 minutes.
A.improper fraction B.less than C.length D.hour
- B If you multiply a number by one, the product is the same as that number.
A.inch B.identity property of multiplication C.inverse operations D.intersecting lines
- D How long something is. The distance from one point to another measured in units such as inches, feet, centimeters, etc.
A.identity property of multiplication B.intersecting lines C.kilometer D.length
- C If you add zero to any number, the sum is the same as that number.
A.kilogram B.less than C.identity property of addition D.identity property of multiplication
