

## 4th Grade CCSS Math Vocabulary Quiz 28

- B If you add zero to any number, the sum is the same as that number.  
A.kilometer B.identity property of addition C.less than D.improper fraction
- A A term used for a fraction whose numerator is greater than or equal to its denominator.  
A.improper fraction B.identity property of addition C.length D.inch
- C Operations that undo each other.  
A.kilometer B.identity property of multiplication C.inverse operations D.hundredth
- A Lines that cross at a point.  
A.intersecting lines B.hour C.inch D.kilogram
- C A customary unit of length equal to  $\frac{1}{12}$  of a foot.  
A.kilogram B.inverse operations C.inch D.identity property of addition
- D A metric unit of mass equal to 1,000 grams.  
A.hundredth B.inch C.improper fraction D.kilogram
- D Used to compare two numbers when the first number is smaller than the second number.  
A.hundredth B.kilometer C.identity property of multiplication D.less than
- A A unit of time equal to 60 minutes.  
A.hour B.kilogram C.inch D.length
- D If you multiply a number by one, the product is the same as that number.  
A.improper fraction B.length C.hour D.identity property of multiplication
- B A metric unit of length equal to 1,000 meters.  
A.identity property of multiplication B.kilometer C.inch D.hour
- B One of the equal parts when a whole is divided into 100 equal parts.  
A.improper fraction B.hundredth C.hour D.length
- D How long something is. The distance from one point to another measured in units such as inches, feet, centimeters, etc.  
A.inch B.less than C.hundredth D.length
