

# 4th Grade CCSS Math Word Search Puzzle 1

1. First, write the correct clue number to the left of each word in the Word Bank. Then, circle the words that have been hidden vertically, horizontally, and diagonally.

- Changing the groupings of three or more factors does not change the product.
- An angle with a measure of less than  $90^\circ$ .
- A model of multiplication that shows each place value product.
- To join two or more numbers or quantities to get one number called the sum or total.
- An arrangement of objects in equal rows.
- Changing the groupings of three or more addends does not change the sum.
- Part of a circle between any two of its points.
- Two rays that share an endpoint.
- A way of setting out a step-by-step mathematical procedure.
- The measure in square units of the inside of a plane figure.
- It tells how far one side is turned from the other side.
- Problems that ask how much more (or less) one amount is than another.
