1. A number that has a whole number (not 0) and a fraction.
2. A set of rules that tells the order in which to compute (PEMDAS).
3. One sixtieth of an hour or 60 seconds.
4. The operation of repeated addition of the same number.
5. A product of a given whole number and any other whole number.
6. The number written above the line in a fraction. It tells how many equal parts are described in he fraction.
7. Lines that are always the same distance apart. They do not intersect.
8. Used in mathematics as grouping symbols for operations. ()
9. A diagram that represents numbers as points on a line.
10. A customary unit of weight equal to one-sixteenth of a pound.
11. A repeating or growing sequence or design. An ordered set of numbers or shapes arranged according to a rule.
12. An angle with a measure greater than 90° but less than 180°.

parenthesis	multiple	number line
obtuse angle	parallel lines	numerator
multiplication	order of operations	pattern
mixed number	ounce	minute
