1. The amount that remains after one quantity is subtracted from another.
2. Fractions that have the same value.
3. To find the value of a mathematical expression.
4. A mathematical sentence with an equal sign. The amount on one side of the equal sign has the same value as the amount on the other side.
5. Any one of the symbols $0,1,2,3,4,5,6,7,8$, and 9.
6. To separate into equal groups and find the number in each group or the number of groups.
7. Having the same value.
8. When one of the factors of a product is a sum, multiplying each addend before adding does not change the product.
9. To find a number close to an exact amount.
10. The number by which another number is divided.
11. A number that is divided by another number.
12. A point at either end of a line segment, or a point at one end of a ray.

| dividend | difference | equation |
| :--- | :--- | :--- |
| divisor | estimate | divide |
| evaluate | equivalent fraction | equal |
| distributive property | endpoint | digits |
