- Used to compare two numbers when the first number is smaller than the second number.
- Lines that cross at a point.
- If you add zero to any number, the sum is the same as that number.
- A term used for a fraction whose numerator is greater than or equal to its denominator.
- A unit of time equal to 60 minutes.
- How long something is. The distance from one point to another measured in units such as inches, feet, centimeters, etc.
- A customary unit of length equal to 1/12 of a foot.
- A metric unit of mass equal to 1,000 grams.
- A metric unit of length equal to 1,000 meters.
- If you multiply a number by one, the product is the same as that number.
- One of the equal parts when a whole is divided into 100 equal parts.
- Operations that undo each other.

inverse operations
kilometer
improper fraction
hour

length
inch
less than
hundredth

identity property of addition
kilogram
identity property of multiplication
intersecting lines
