- The operation of repeated addition of the same number.
- A repeating or growing sequence or design. An ordered set of numbers or shapes arranged according to a rule.
- A customary unit of weight equal to one-sixteenth of a pound.
- A product of a given whole number and any other whole number.
- An angle with a measure greater than  $90^\circ$  but less than  $180^\circ$ .
- One sixtieth of an hour or 60 seconds.
- A diagram that represents numbers as points on a line.
- The number written above the line in a fraction. It tells how many equal parts are described in the fraction.
- A set of rules that tells the order in which to compute (PEMDAS).
- A number that has a whole number (not 0) and a fraction.
- Lines that are always the same distance apart. They do not intersect.
- Used in mathematics as grouping symbols for operations. ( )
