4th Grade CCSS Math Vocabulary Study Sheet 1

1. acute angle   An angle with a measure of less than 90°.

2. add   To join two or more numbers or quantities to get one number called the sum or total.

3. additive comparisons   Problems that ask how much more (or less) one amount is than another.

4. algorithm   A way of setting out a step-by-step mathematical procedure.

5. angle   Two rays that share an endpoint.

6. angle measure   It tells how far one side is turned from the other side.

7. arc   Part of a circle between any two of its points.

8. area   The measure in square units of the inside of a plane figure.

9. area model   A model of multiplication that shows each place value product.

10. array   An arrangement of objects in equal rows.

11. associative property of multiplication   Changing the groupings of three or more factors does not change the product.

12. associative property of addition   Changing the groupings of three or more addends does not change the sum.
