

## 4th Grade CCSS Math Vocabulary Study Sheet 6

- |  |   |
|--|---|
| 1. hour                                | A unit of time equal to 60 minutes.   |
| 2. hundredth                           | One of the equal parts when a whole is divided into 100 equal parts.  |
| 3. identity property of addition       | If you add zero to any number, the sum is the same as that number.  |
| 4. identity property of multiplication | If you multiply a number by one, the product is the same as that number.  |
| 5. improper fraction                   | A term used for a fraction whose numerator is greater than or equal to its denominator.                                 |
| 6. inch                                | A customary unit of length equal to $\frac{1}{12}$ of a foot.   |
| 7. intersecting lines                  | Lines that cross at a point.  |
| 8. inverse operations                  | Operations that undo each other.  |
| 9. kilogram                            | A metric unit of mass equal to 1,000 grams.   |
| 10. kilometer                          | A metric unit of length equal to 1,000 meters.  |
| 11. length                             | How long something is. The distance from one point to another measured in units such as inches, feet, centimeters, etc. |
| 12. less than                          | Used to compare two numbers when the first number is smaller than the second number.                                    |
