|  |  |  |  |  |  |  |  |  | P |  |  |  |  |  |  |  |  |  |  |  |  |

1. A mathematical process applied to solve a problem.
2. Three-dimensional objects that have height, length, and width such as spheres, cylinders, cones, cubes, rectangular prisms, and pyramids. Shapes, appearances, or arrangements.
3. A number written as a product of its factors.
4. A mathematical notation indicating the numbe of times a quantity is multiplied by itself.
5. The explanation or answer for a problem.
6. A mathematical phrase that contains operations, numbers, and/or variables, but doesn't have an equal sign.
7. A mathematical expression which shows that two quantities are not equal.
8. A set of two things used together or regarded as a unit.

| operation | pair |
| :--- | :--- |
| coefficient | expression |
| solution | exponent |
| evaluate | forms |

9. A pair of symbols used to enclose sections of an expression. \{ \}
10. A number that when multiplied by itself equals a given number.
11. Operations that undo each other.
12. The ways that two things are similar, different, or otherwise connected. An association between two or more variables.
13. PEMDAS (Parentheses, Exponents, Multiplication/Division left to right, Addition/Subtraction left to right).
14. A number in front of a variable.
15. To find the value of a numerical or algebraic expression.
16. An exact location in space represented by a dot.
inverse operations point square root inequality relationship
factorization braces
order of operations
