1. A mathematical notation indicating the number of times a quantity is multiplied by itself.
2. A mathematical process applied to solve a problem.
3. To find the value of a numerical or algebraic expression.
4. The ways that two things are similar, different, or otherwise connected. An association between two or more variables.
5. A set of two things used together or regarded as a unit.
6. A pair of symbols used to enclose sections of an expression. { }
7. A number in front of a variable.
8. A number written as a product of its factors.
9. A number that when multiplied by itself equals a given number.
10. The explanation or answer for a problem.
11. Three-dimensional objects that have height, length, and width such as spheres, cylinders, cones, cubes, rectangular prisms, and pyramids. Shapes, appearances, or arrangements.
12. A mathematical phrase that contains operations, numbers, and/or variables, but doesn't have an equal sign.
13. PEMDAS (Parentheses, Exponents, Multiplication/Division left to right, Addition/Subtraction left to right).
14. An exact location in space represented by a dot.
15. Operations that undo each other.
16. A mathematical expression which shows that two quantities are not equal.
