1. An exact location in space represented by a dot.
2. A number in front of a variable.
3. A number written as a product of its factors.
4. To find the value of a numerical or algebraic expression.
5. A mathematical expression which shows that two quantities are not equal.
6. A mathematical notation indicating the number of times a quantity is multiplied by itself.
7. PEMDAS (Parentheses, Exponents, Multiplication/Division left to right, Addition/Subtraction left to right).
8. The ways that two things are similar, different, or otherwise connected. An association between two or more variables.
9. The explanation or answer for a problem.
10. A set of two things used together or regarded as a unit.
11. Three-dimensional objects that have height, length, and width such as spheres, cylinders, cones, cubes, rectangular prisms, and pyramids. Shapes, appearances, or arrangements.
12. A pair of symbols used to enclose sections of an expression. \{ \}
13. Operations that undo each other.
14. A mathematical phrase that contains operations, numbers, and/or variables, but doesn't have an equal sign.
15. A mathematical process applied to solve a problem.
16. A number that when multiplied by itself equals a given number.

| square root | exponent |
| :--- | :--- |
| relationship | factorization |
| inverse operations | braces |
| coefficient | point |
