

5th Grade CCSS Math Vocabulary Crossword 27

1. Using the Across and Down clues, write the correct words in the numbered grid below.

ACROSS

- Breaking down a composite number until all of the factors are prime.
- A pair of symbols used to set apart parts of a problem so that those parts are done first. ()
- To rewrite a fraction in lowest terms.
- Can be divided evenly without leaving a remainder.
- To find the answer by using arithmetic, adding, subtracting, multiplying or dividing. To figure out by reason or logic.
- The answer to a multiplication problem.
- A plane formed by the intersection of a horizontal number line called the x-axis and a vertical number line called the y-axis.
- To follow each other in an unbroken sequence.

DOWN

- Pairs of numbers used to locate points on a coordinate grid. The first number in a pair tells how far to move horizontally, and the second number tells how far to move vertically.
- A way of making sure your answer is reasonable by making an approximate calculation. Rounding is a commonly used strategy.
- Having the same value or amount.
- The ratio of a number to 100 (per one hundred). %
