# 5th Grade CCSS Math Vocabluary Crossword 27

1. *Using the Across and Down clues, write the correct words in the numbered grid below.*

ACROSS

1. Breaking down a composite number until all of the factors are prime.
3. A pair of symbols used to set apart parts of a problem so that those parts are done first. ()
7. To rewrite a fraction in lowest terms.
8. Can be divided evenly without leaving a remainder.
9. To find the answer by using arithmetic, adding, subtracting, multiplying or dividing. To figure out by reason or logic.
10. The answer to a multiplication problem.
11. A plane formed by the intersection of a horizontal number line called the x-axis and a vertical number line called the y-axis.
12. To follow each other in an unbroken sequence.

DOWN

2. Pairs of numbers used to locate points on a coordinate grid. The first number in a pair tells how far to move horizontally, and the second number tells how far to move vertically.
4. A way of making sure your answer is reasonable by making an approximate calculation. Rounding is a commonly used strategy.
5. Having the same value or amount.
6. The ratio of a number to 100 (per one hundred). %

coordinate plane	estimation	divisible	consecutive
percent	ordered pairs	product	calculate
reduce	parentheses	equivalent	prime factorization
