## 5th Grade CCSS Math Vocabluary Matching 1

Write the word that best matches each definition or clue.

1. BRACES
2. FACTORIZATION
3. INEQUALITY
4. OPERATION
5. INVERSE OPERATIONS
6. POINT
7. FORMS $\qquad$
8. SOLUTION
9. SQUARE ROOT
10. EXPRESSION
11. PAIR
12. EVALUATE
13. EXPONENT
14. RELATIONSHIP
15. ORDER OF OPERATIONS
16. COEFFICIENT

Three-dimensional objects that have height, length, and width such as spheres, cylinders, cones, cubes, rectangular prisms, and pyramids. Shapes, appearances, or arrangements.
A pair of symbols used to enclose sections of an expression. \{ \}
A number written as a product of its factors.
A mathematical expression which shows that two quantities are not equal.

A mathematical process applied to solve a problem.
Operations that undo each other.
An exact location in space represented by a dot.

The explanation or answer for a problem.
A number that when multiplied by itself equals a given number.
A mathematical phrase that contains operations, numbers, and/or variables, but doesn't have an equal sign.

A set of two things used together or regarded as a unit.
To find the value of a numerical or algebraic expression.
A mathematical notation indicating the number of times a quantity is multiplied by itself.

The ways that two things are similar, different, or otherwise connected. An association between two or more variables.

PEMDAS (Parentheses, Exponents, Multiplication/Division left to right, Addition/Subtraction left to right).

A number in front of a variable.

| inequality | forms | pair | expression |
| :--- | :--- | :--- | :--- |
| point | solution | evaluate | factorization |
| square root | braces | coefficient | order of operations |
| inverse operations | operation | exponent | relationship |
