5th Grade CCSS Math Vocabluary Matching 1

Write the word that best matches each definition or clue.

1. _____ A pair of symbols used to enclose sections of an expression. { }

2. _____ A number written as a product of its factors.

3. _____ A mathematical expression which shows that two quantities are not equal.

4. _____ A mathematical process applied to solve a problem.

5. _____ Operations that undo each other.

6. _____ An exact location in space represented by a dot.

7. _____ Three-dimensional objects that have height, length, and width such as spheres, cylinders, cones, cubes, rectangular prisms, and pyramids. Shapes, appearances, or arrangements.

8. _____ The explanation or answer for a problem.

9. _____ A number that when multiplied by itself equals a given number.

10. _____ A mathematical phrase that contains operations, numbers, and/or variables, but doesn't have an equal sign.

11. _____ A set of two things used together or regarded as a unit.

12. _____ To find the value of a numerical or algebraic expression.

13. _____ A mathematical notation indicating the number of times a quantity is multiplied by itself.

14. _____ The ways that two things are similar, different, or otherwise connected. An association between two or more variables.

15. _____ PEMDAS (Parentheses, Exponents, Multiplication/Division left to right, Addition/Subtraction left to right).

16. _____ A number in front of a variable.

inequality	forms	pair	expression
point	solution	evaluate	factorization
square root	braces	coefficient	order of operations
inverse operations	operation	exponent	relationship
