5th Grade CCSS Math Vocabluary Matching 11

Write the word that best matches each definition or clue.

1. _____ A mathematical process applied to solve a problem.

2. _____ A pair of symbols used to enclose sections of an expression. { }

3. _____ A mathematical notation indicating the number of times a quantity is multiplied by itself.

4. _____ Three-dimensional objects that have height, length, and width such as spheres, cylinders, cones, cubes, rectangular prisms, and pyramids. Shapes, appearances, or arrangements.

5. _____ PEMDAS (Parentheses, Exponents, Multiplication/Division left to right, Addition/Subtraction left to right).

6. _____ A mathematical expression which shows that two quantities are not equal.

7. _____ The ways that two things are similar, different, or otherwise connected. An association between two or more variables.

8. _____ An exact location in space represented by a dot.

9. _____ A number written as a product of its factors.

10. _____ To find the value of a numerical or algebraic expression.

11. _____ A number that when multiplied by itself equals a given number.

12. _____ A mathematical phrase that contains operations, numbers, and/or variables, but doesn't have an equal sign.

13. _____ A number in front of a variable.

14. _____ Operations that undo each other.

15. _____ A set of two things used together or regarded as a unit.

16. _____ The explanation or answer for a problem.

relationship	coefficient	pair	point
operation	braces	factorization	exponent
inequality	solution	evaluate	inverse operations
square root	forms	expression	order of operations
