5th Grade CCSS Math Vocabluary Matching 6

Write the word that best matches each definition or clue.

1. COEFFICIENT — A number in front of a variable.

2. SQUARE ROOT — A number that when multiplied by itself equals a given number.

3. EXPRESSION — A mathematical phrase that contains operations, numbers, and/or variables, but doesn't have an equal sign.

4. EXPONENT — A mathematical notation indicating the number of times a quantity is multiplied by itself.

5. BRACES — A pair of symbols used to enclose sections of an expression. { }

6. INVERSE OPERATIONS — Operations that undo each other.

7. OPERATION — A mathematical process applied to solve a problem.

8. INEQUALITY — A mathematical expression which shows that two quantities are not equal.

9. POINT — An exact location in space represented by a dot.

10. FACTORIZATION — A number written as a product of its factors.

11. FORMS — Three-dimensional objects that have height, length, and width such as spheres, cylinders, cones, cubes, rectangular prisms, and pyramids. Shapes, appearances, or arrangements.

12. PAIR — A set of two things used together or regarded as a unit.

13. SOLUTION — The explanation or answer for a problem.

14. EVALUATE — To find the value of a numerical or algebraic expression.

15. RELATIONSHIP — The ways that two things are similar, different, or otherwise connected. An association between two or more variables.

16. ORDER OF OPERATIONS — PEMDAS (Parentheses, Exponents, Multiplication/Division left to right, Addition/Subtraction left to right).

order of operations	evaluate	square root	coefficient
operation	relationship	point	braces
pair	expression	solution	factorization
inequality	forms	inverse operations	exponent
