- A set of numbers arranged in a special order or pattern.
- A letter or symbol that represents a number.
- A fraction that has 1 as its numerator.
- The point at which two line segments, lines, or rays meet to form an angle.
- Having length, width, area, but not volume.
- An operation that gives the difference between two numbers.
- The measure of how heavy something is.
- Denominators that are not equal.
- A common or usual way of writing a number using digits.
- A unit, such as square centimeter or square inch, used to measure area.
- The number of cubic units it takes to fill a figure.
- When a fraction is expressed with the fewest possible pieces. Also called lowest terms.
- A duration of a segment of time.
- Zero and the counting numbers 1, 2, 3, 4, 5, 6, and so on. No negative signs, decimal points, or parts that are fractions.
- One of the equal parts when a whole is divided into 10 equal parts.
- One sixtieth of a minute. There are 60 of them in 1 minute.
