1. The number written above the line in a fraction. It tells how many equal parts are described in the fraction.
2. The distance around the outside of a figure.
3. A set of rules that tells the order in which to compute. PEMDAS.
4. A product made by multiplying two whole numbers larger than 1.
5. A system of measurement based on tens. The basic unit of capacity is the liter. The basic unit of length is the meter. The basic unit of mass is the gram.
6. The operation of repeated addition of the sam number.
7. A metric unit of length. 1,000 of these equal 1 meter.
8. One sixtieth of an hour or 60 seconds.
9. Lines that are always the same distance apart and don't intersect.
10. A customary unit of weight equal to one sixteenth of a pound.
11. A number that has a whole number (not 0 ) and a fraction.
12. A diagram that represents numbers as points on a line.
13. An angle with a measure greater than $90^{\circ}$ but less than $180^{\circ}$.
14. A standard unit of length in the metric system.
15. A metric unit of capacity. 1,000 of these $=1$ liter.
