- |                                                                                            |                                                                                                                                |
|--------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| 1. To express a fraction in simplest form.                                                 | 10. Zero and the counting numbers 1, 2, 3, 4, 5, 6, and so on. No negative signs, decimal points, or parts that are fractions. |
| 2. A fraction that has 1 as its numerator.                                                 | 11. The number of cubic units it takes to fill a figure.                                                                       |
| 3. A common or usual way of writing a number using digits.                                 | 12. The measure of how heavy something is.                                                                                     |
| 4. A duration of a segment of time.                                                        | 13. An operation that gives the difference between two numbers.                                                                |
| 5. One sixtieth of a minute. There are 60 of them in 1 minute.                             | 14. The answer to an addition problem.                                                                                         |
| 6. One of the equal parts when a whole is divided into 10 equal parts.                     | 15. A letter or symbol that represents a number.                                                                               |
| 7. The point at which two line segments, lines, or rays meet to form an angle.             | 16. A set of numbers arranged in a special order or pattern.                                                                   |
| 8. Having length, width, area, but not volume.                                             |                                                                                                                                |
| 9. When a fraction is expressed with the fewest possible pieces. Also called lowest terms. |                                                                                                                                |
