

1. Using the Across and Down clues, write the correct words in the numbered grid below.

ACROSS

- 1. A step-by-step method for computing
- 4. Characteristics, properties, or features which allow items to be sorted and classified.
- 6. Part of a circle between any two of its points.
- 8. The measure of the size of an angle.
- 10. To determine if one number is greater than, less than, or equal to another number.
- 11. Refers to the amount of liquid a container can hold.
- 12. Compares how much more or less one amount is than another.
- 14. Any number being added.

DOWN

- 1. An arrangement of objects in equal rows.
- 2. A common multiple of the denominators for two or more fractions.
- 3. A plane figure with all points the same distance from a fixed point called a center.
- 5. An angle with a measure less than 90 degrees.
- 6. A model of multiplication that shows each place value product.
- 7. A metric unit of length equal to 0.01 of a meter.
- 8. The measure in square units of the inside of a plane figure.
- 9. Two rays that share an endpoint.
- 10. To sort into categories or to arrange into groups by attributes.
- 13. To combine or to put together two or more quantities
