# 7th Grade CCSS Math Vocabluary Matching 14

*Write the word that best matches each definition or clue.*

1. _____ Average of the absolute values of the deviations of each data value from the mean.

2. _____ Angles on the outside of a triangle.

3. _____ Equal to twice the radius of the circle.

4. _____ Circle that fits exactly within the boundaries of another shape.

5. _____ Largest factor that two or more numbers or terms have in common.

6. _____ Operations that undo each other.

7. _____ When values vary so that one increases or decreases a specific amount, the other value increases or decreases by a constant.

8. _____ Decimal that continues without end.

9. _____ Order numbers least to greatest then find the middle value or find average of two middle values.

10. _____ Decimal neither terminates nor repeats.

11. _____ Angle whose measure is greater than 90º but less than 180º.

12. _____ Two numbers that when multiplied together equal 1.

13. _____ Average of data set.

14. _____ In a data set, this is the value(s) that occurs most often.

15. _____ Result of a single trial of an experiment.

16. _____ Two adjacent angles that have noncommon sides that form a line.

17. _____ Mathematical sentence that is created by placing an equal sign between two expressions.

18. _____ Measure of the exterior angle of a triangle is equal to the sum of the measures of the two remote interior angles of the triangle.

A. mode
B. exterior angle theorem
C. mean absolute deviation
D. inverse operations
E. non-repeating decimals
F. exterior angles
G. direct variation
H. inscribed circle
I. non-terminating decimal
J. multiplicative inverse
K. median
L. equation
M. mean
N. obtuse angle
O. outcome
P. greatest common factor
Q. diameter
R. linear pair
