# 7th Grade CCSS Math Vocabluary Matching 2

*Write the word that best matches each definition or clue.*

1. _____ Angles on the outside of a triangle.
2. _____ Result of a single trial of an experiment.
3. _____ Average of the absolute values of the deviations of each data value from the mean.
4. _____ Decimal neither terminates nor repeats.
5. _____ Operations that undo each other.
6. _____ Mathematical sentence that is created by placing an equal sign between two expressions.
7. _____ Two numbers that when multiplied together equal 1.
8. _____ Measure of the exterior angle of a triangle is equal to the sum of the measures of the two remote interior angles of the triangle.
9. _____ Decimal that continues without end.
10. _____ Order numbers least to greatest then find the middle value or find average of two middle values.
11. _____ Equal to twice the radius of the circle.
12. _____ Angle whose measure is greater than 90º but less than 180º.
13. _____ Two adjacent angles that have noncommon sides that form a line.
14. _____ When values vary so that one increases or decreases a specific amount, the other value increases or decreases by a constant.
15. _____ Largest factor that two or more numbers or terms have in common.
16. _____ Circle that fits exactly within the boundaries of another shape.
17. _____ In a data set, this is the value(s) that occurs most often.
18. _____ Average of data set.

| | | |
|---|---|---|
| A. exterior angles | B. multiplicative inverse | C. equation |
| D. direct variation | E. mode | F. greatest common factor |
| G. non-terminating decimal | H. obtuse angle | I. median |
| J. non-repeating decimals | K. inscribed circle | L. outcome |
| M. mean absolute deviation | N. inverse operations | O. diameter |
| P. mean | Q. linear pair | R. exterior angle theorem |
