

7th Grade CCSS Math Vocabulary Word Search 10

1. First, write the correct clue number to the left of each word in the Word Bank. Then, circle the words that have been hidden vertically, horizontally, and diagonally.

- | | |
|---|--|
| 1. Two adjacent angles that have noncommon sides that form a line. | 9. Average of the absolute values of the deviations of each data value from the mean. |
| 2. Order numbers least to greatest then find the middle value or find average of two middle values. | 10. Circle that fits exactly within the boundaries of another shape. |
| 3. Angles on the outside of a triangle. | 11. In a data set, this is the value(s) that occurs most often. |
| 4. When values vary so that one increases or decreases a specific amount, the other value increases or decreases by a constant. | 12. Decimal neither terminates nor repeats. |
| 5. Equal to twice the radius of the circle. | 13. Two numbers that when multiplied together equal 1. |
| 6. Mathematical sentence that is created by placing an equal sign between two expressions. | 14. Measure of the exterior angle of a triangle is equal to the sum of the measures of the two remote interior angles of the triangle. |
| 7. Result of a single trial of an experiment. | 15. Decimal that continues without end. |
| 8. Average of data set. | |

multiplicative inverse

outcome

mean

inscribed circle

mean absolute deviation

mode

non-terminating decimal

exterior angle theorem

median

equation

direct variation

non-repeating decimals

diameter

exterior angles

linear pair
